# Winding and Assembly Systems for Coil Production

*Remato has developed advanced expertise in designing and manufacturing of superior quality machines for the production of wound components for more than 30 years.*

*Thanks to this long standing experience, REMATO offers effective solutions to coil production industry in the following technologies:*

## WINDING TECHNOLOGY

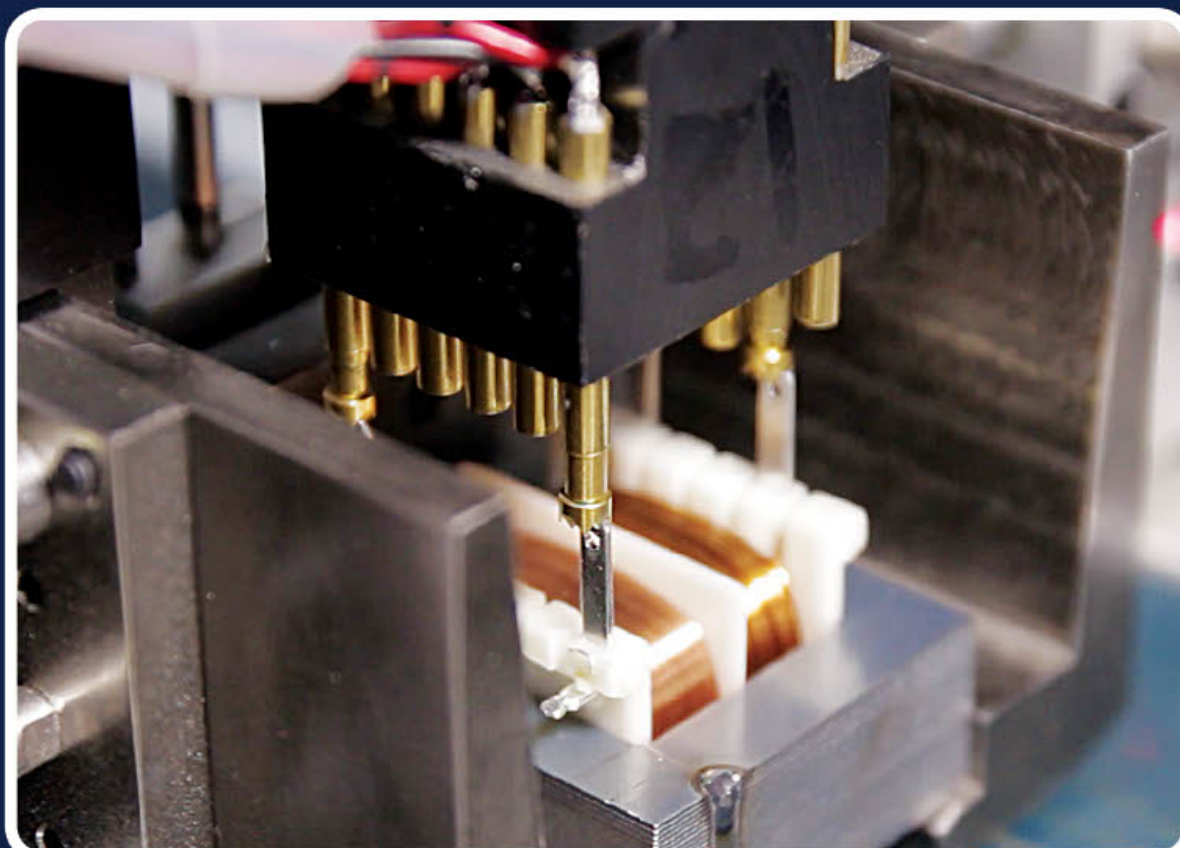

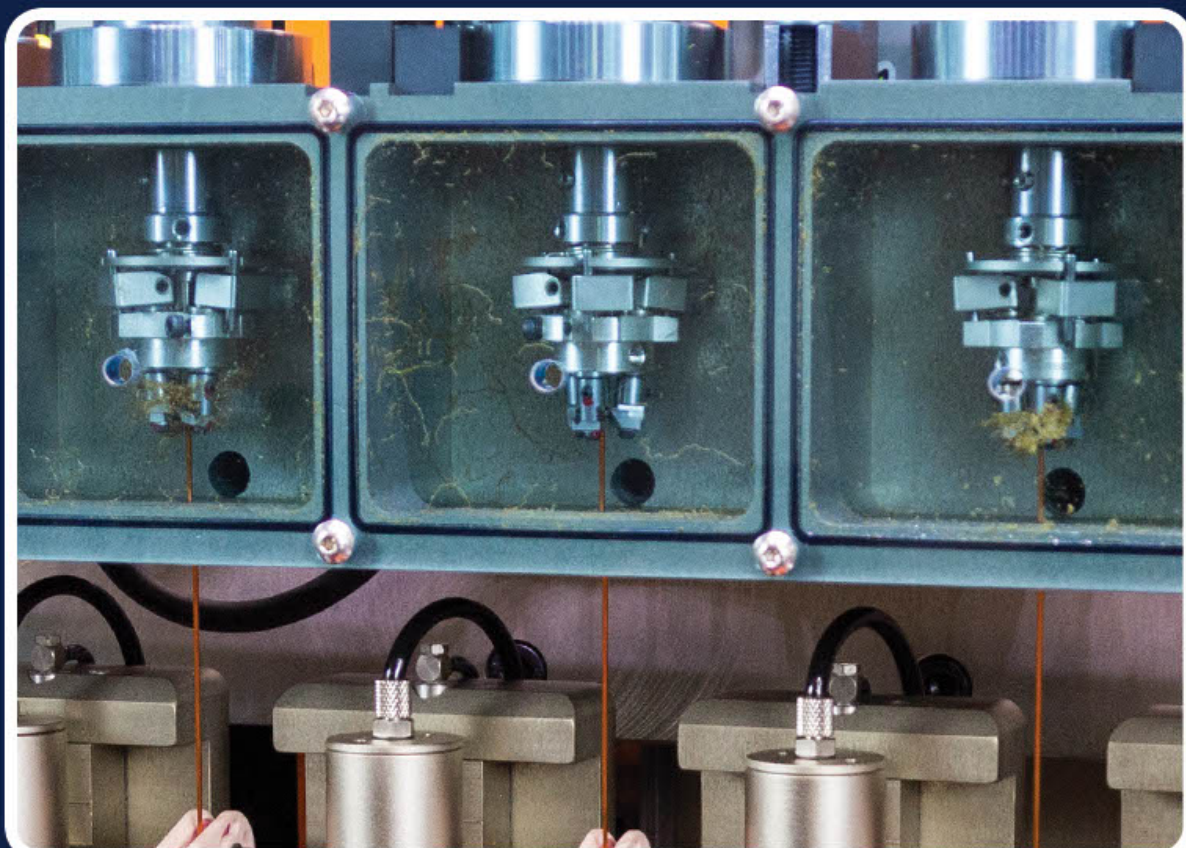

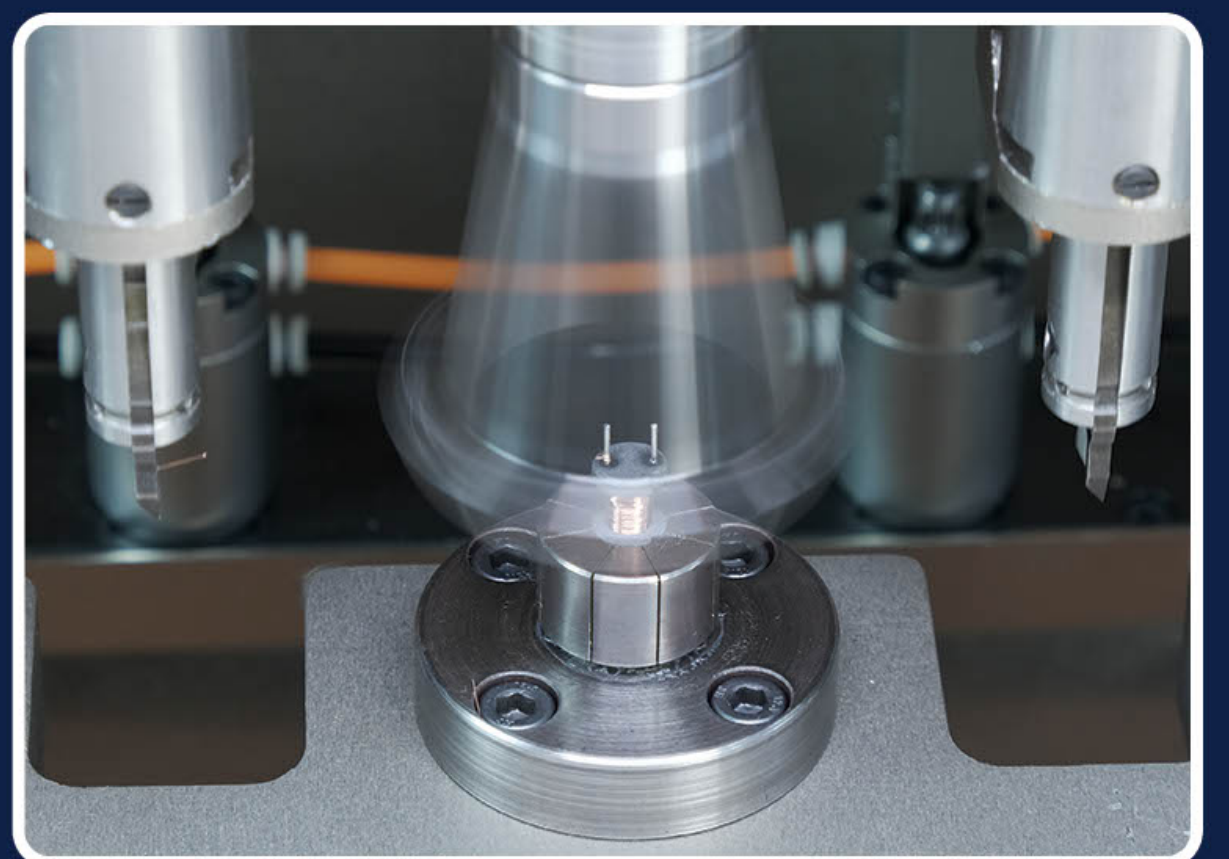

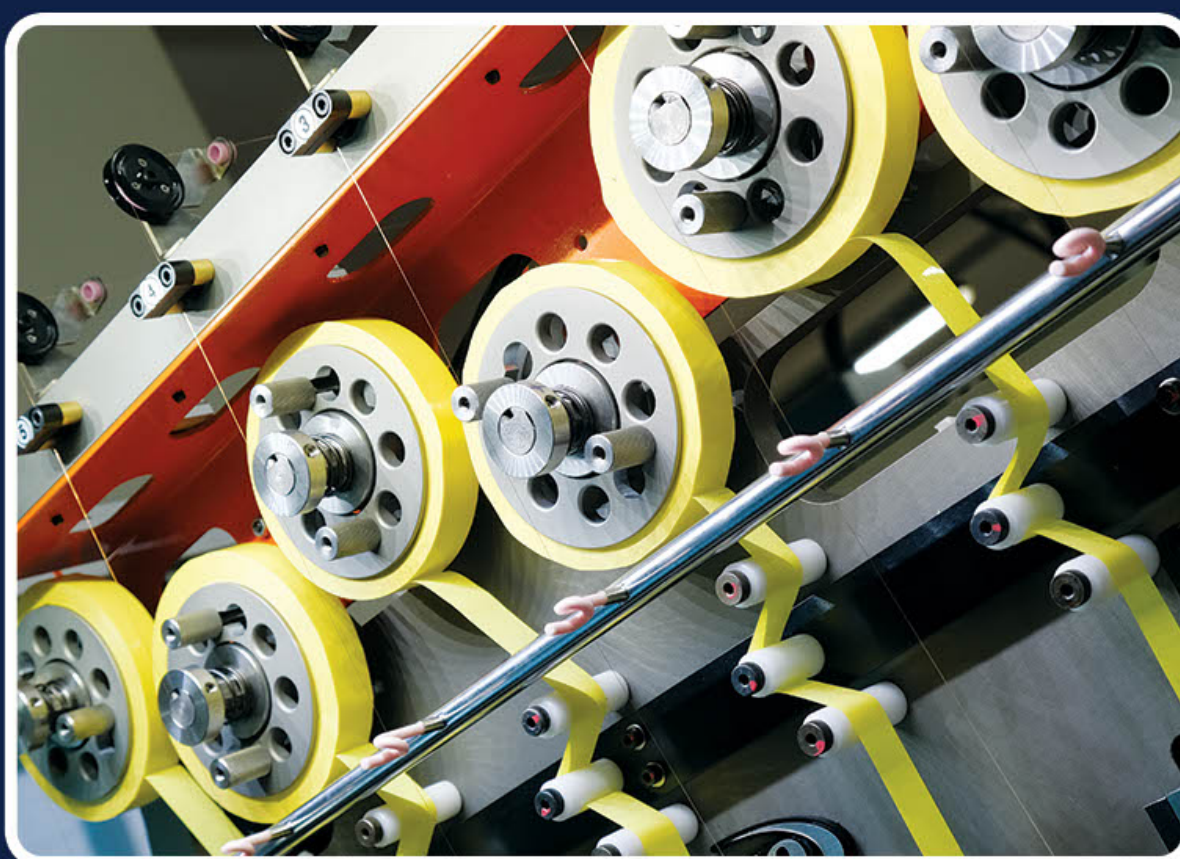

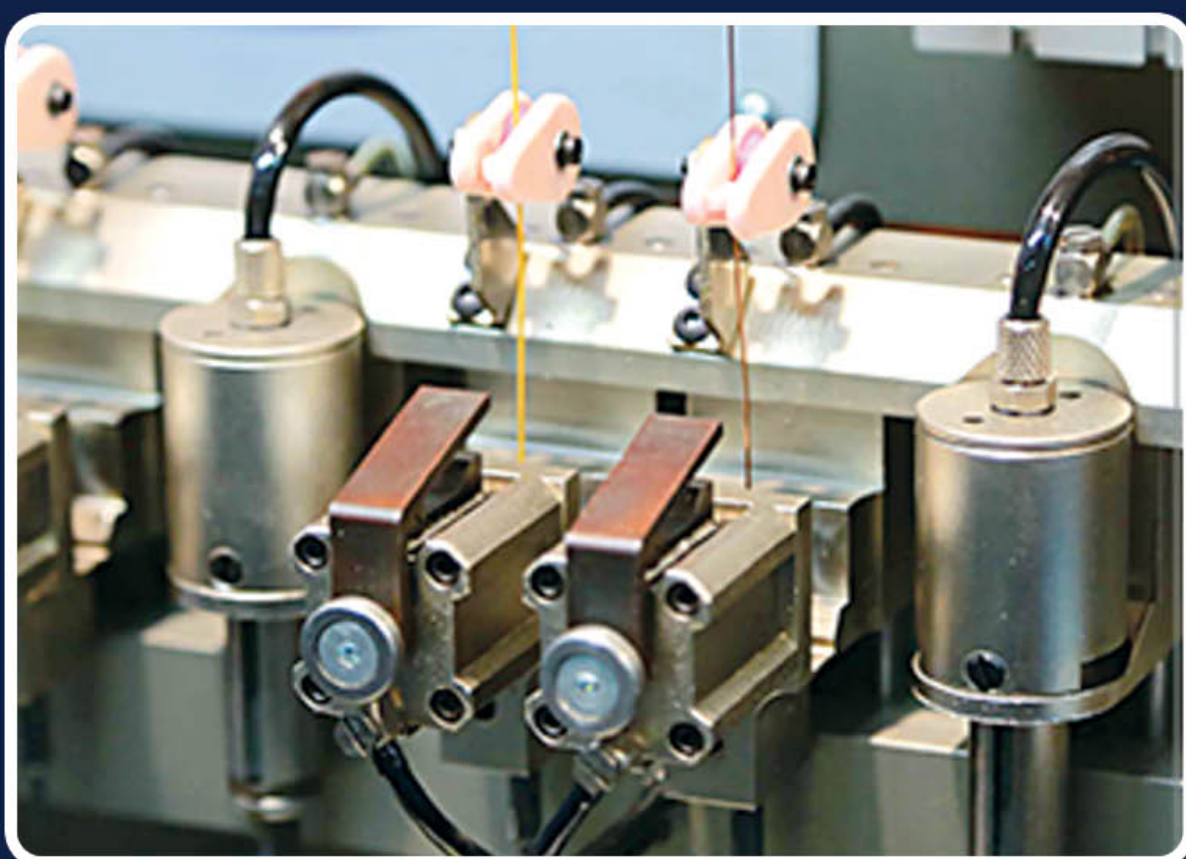

- Spindle
- Flyer
- Layer

## CONTACTING TECHNOLOGY

- Dip Soldering
- Wave Soldering
- Laser Soldering
- Resistance Welding
- Laser Welding
- Tig Welding

## ASSEMBLY TECHNOLOGY

- Pin Inserting
- Stripping
- Taping
- Bowl Feeder
- Bending
- Testing
- Gluing
- Dosing
- UV Curing
- Cutting
- Marking
- Pick and Places
- Robot Applications
- Transfer Systems

# The Easiest Programmable **WINDING MACHINE**

*fast, multifunctional and precise*

①

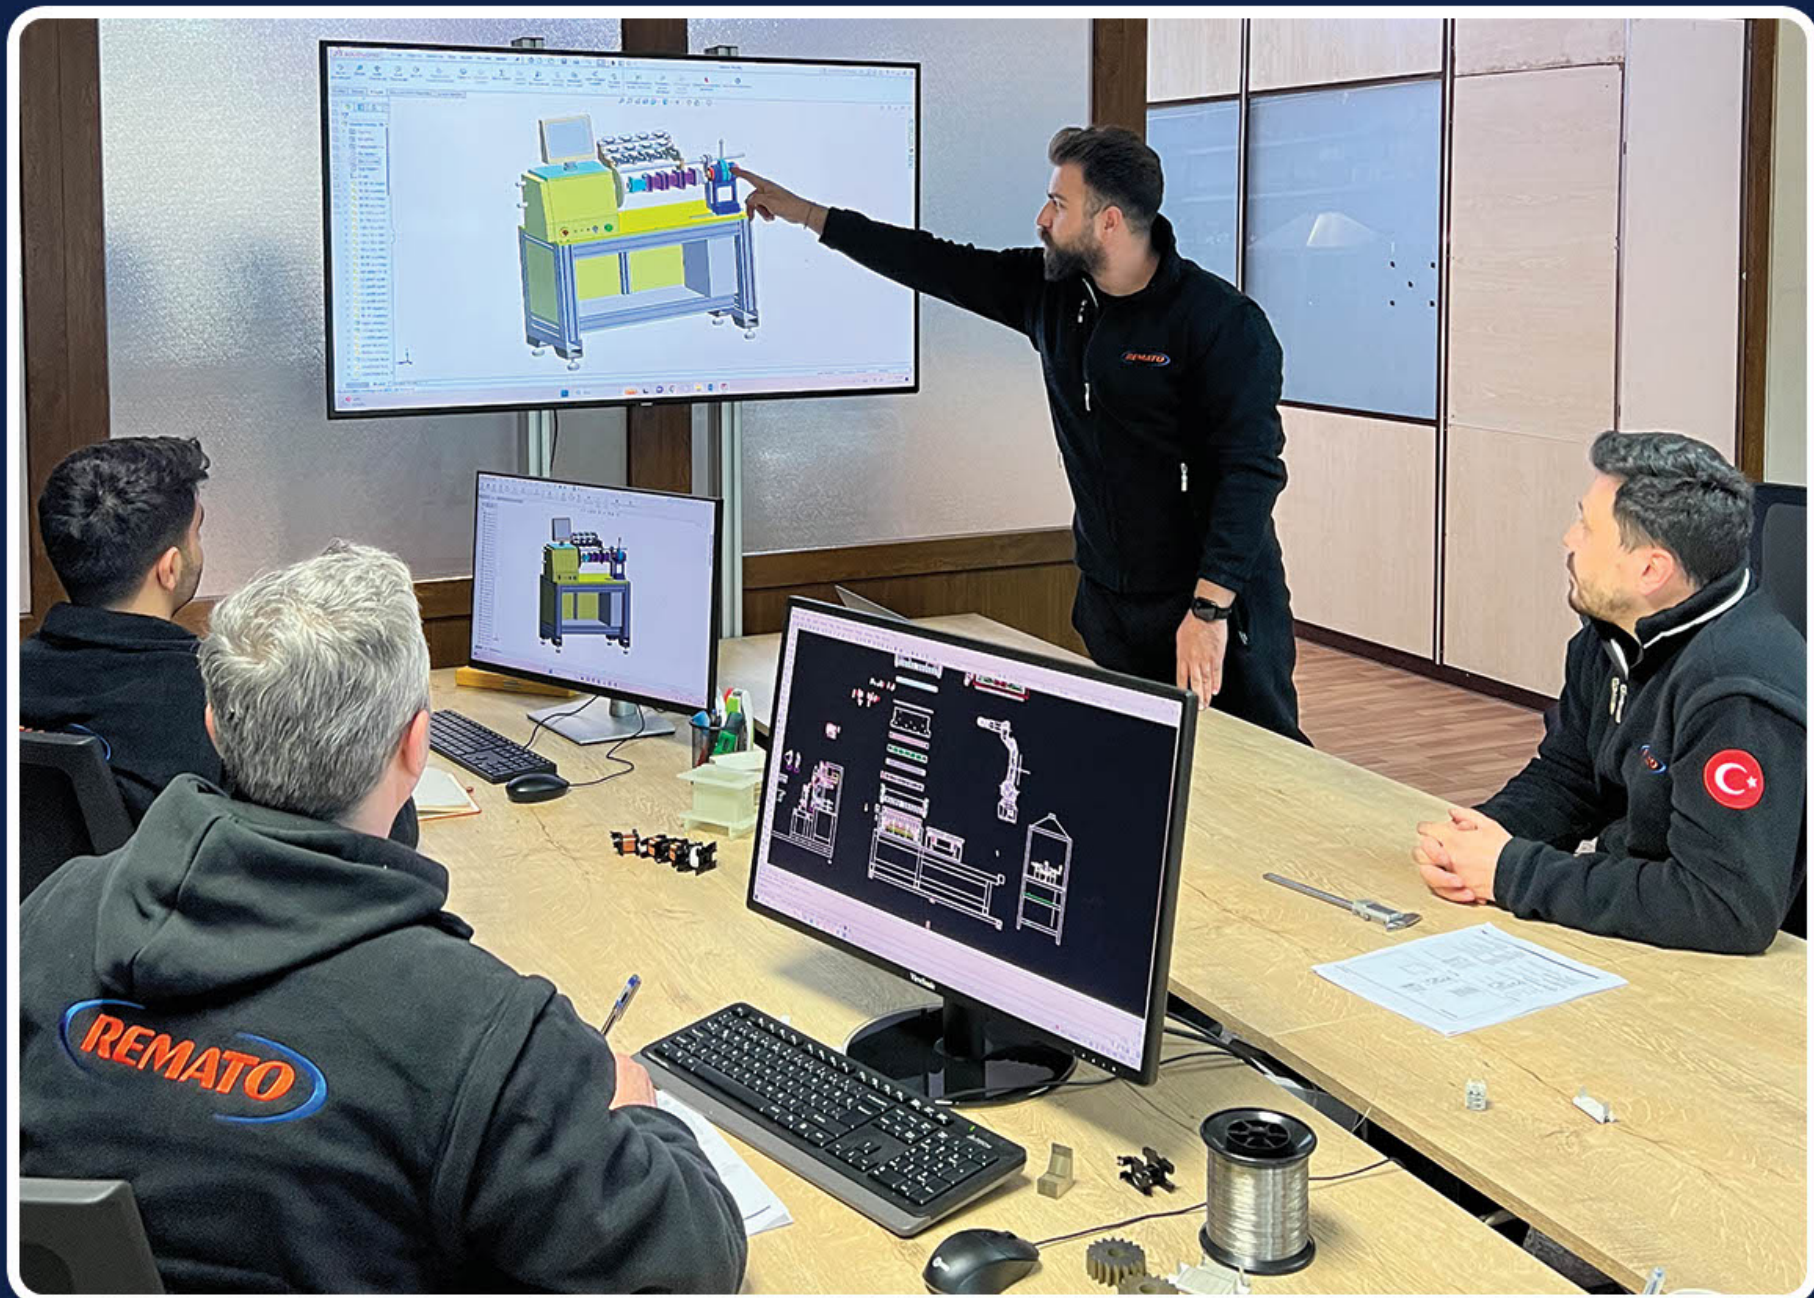

## **R&D CENTER**

**Purpose: Programming ability without needing a user manual!**

*To this purpose, REMATO has developed sophisticated Windows-based software structures that transform complex tasks into smaller, simpler functions.*

*Thanks to the intelligent modularity of our software implementations, machines are easier to manage and user friendly, giving our customers the ability to work more efficiently, gain more comfortable and safe control capability and to program in a very short time.*

②

## ENGINEERING

*We work closely with you throughout the design and construction phases, carefully tailoring the system to precisely match your production requirements, thereby achieving comprehensive customization and seamless integration.*

③

## MANUFACTURING

*Key components are manufactured in REMATO facility. This leads swift access to crucial components minimizing downtime and ensuring seamless project execution.*

④

## ASSEMBLY

*REMATO's assembly division encompasses a wide spectrum of tasks, including mechanical assembly, wiring, automation panel integration and software.*

⑤

## TECHNICAL SERVICE

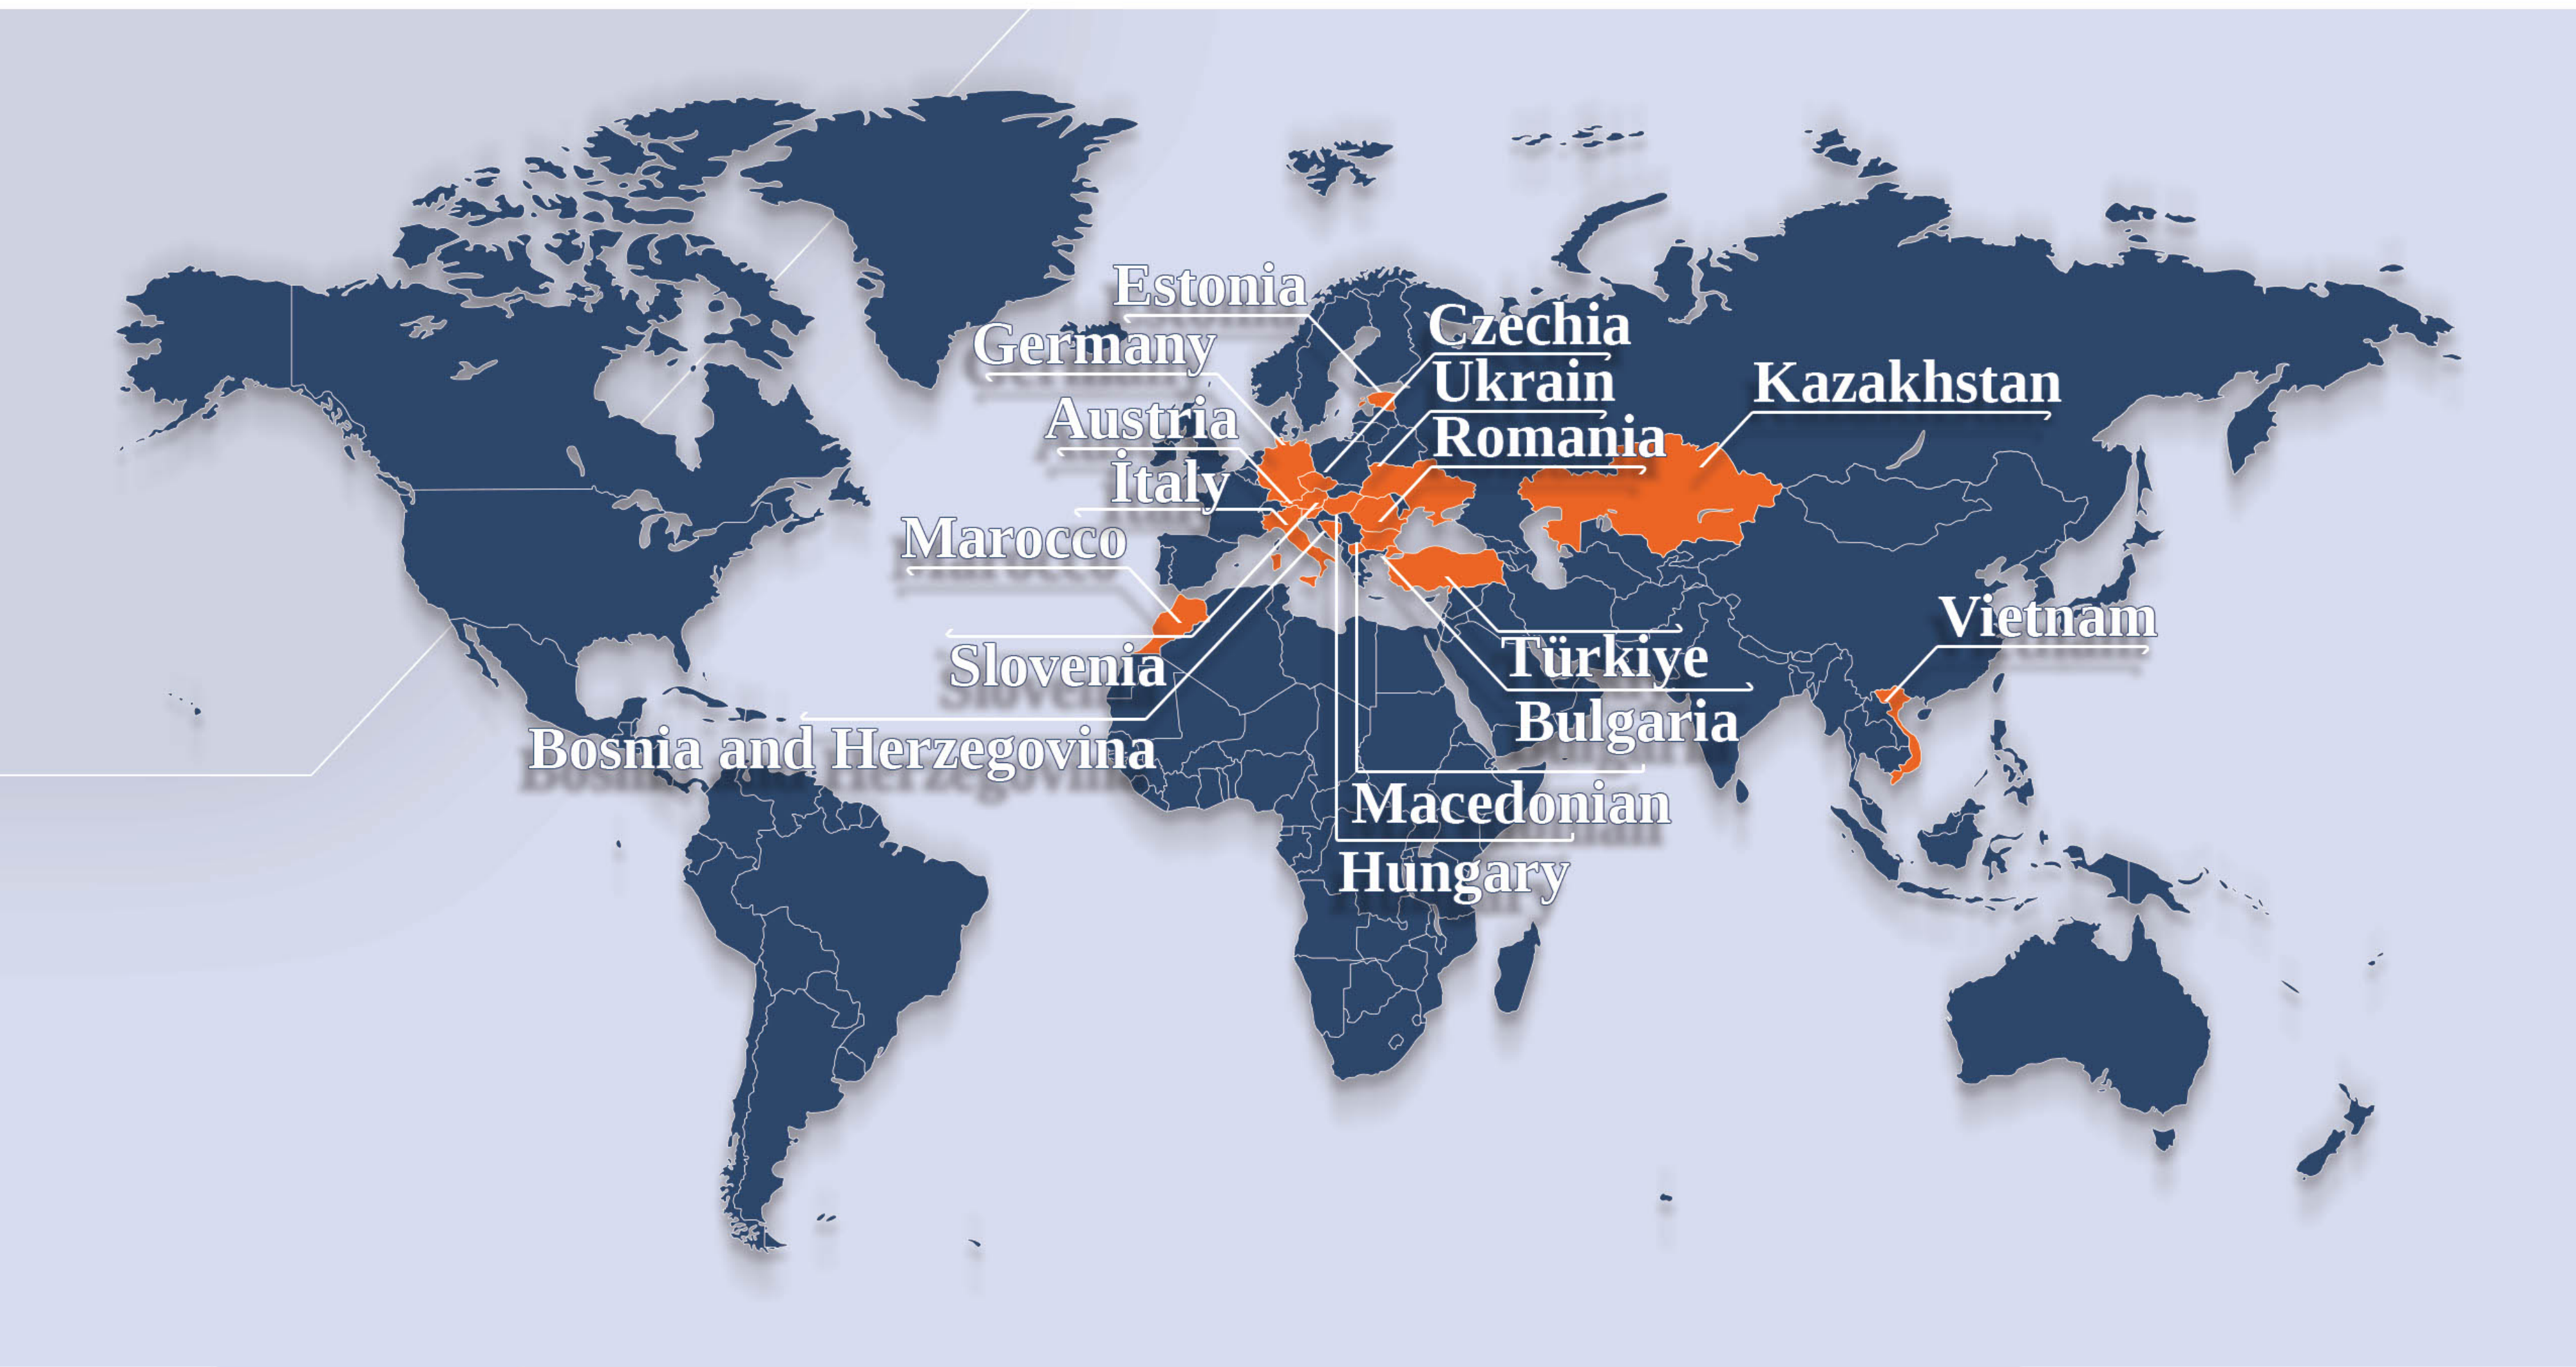

*Maintenance, inspection, spare parts and software modifications our educated engineers guide you through from installation to entire life of the system.*

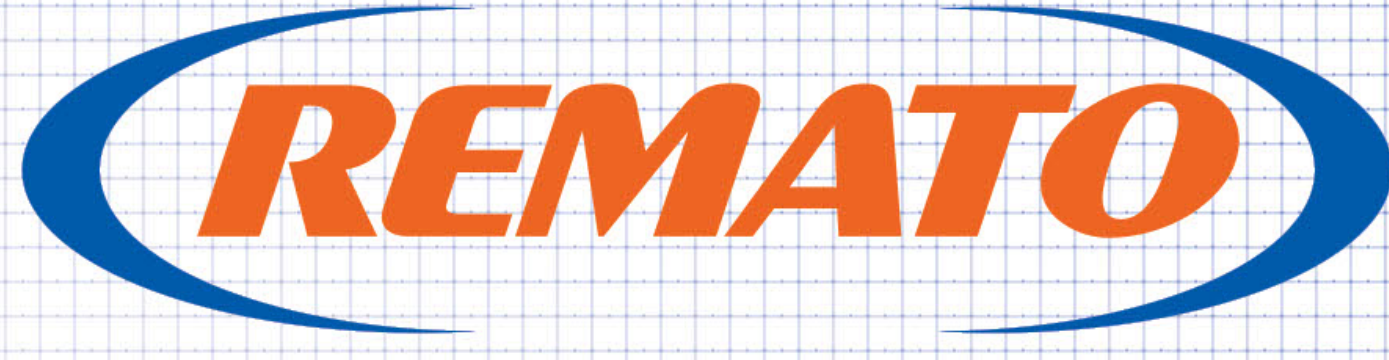

# Worldwide Referances

**30<sup>+</sup>** Years of experience with trusted R&D solutions  
to solve your winding and assembly projects.
